

# CONSULTATION AND COORDINATION

## SCOPING

State Historic Preservation Office staff have visited the park to consult with the NPS, and are aware of the planning efforts that have been undertaken in developing the preferred alternative presented and analyzed in this document. This environmental assessment will be forwarded to the State Historic Preservation Office for their review. In addition, a formal consultation letter was sent to the Maryland SHPO on July 8, 2004. Their comments on this assessment, as well as the response to the formal consultation letter, will be reflected in the final decision document (Finding of No Significant Impact), which will follow the public review of this environmental assessment.

The park and cultural resource specialists at the National Capital Park Regional Office have determined that there are no American Indian tribes associated with Fort Washington Park. Therefore, no tribal or Government-to-Government consultation was initiated prior to this project.

The U.S. Fish & Wildlife Service was contacted on May 27, 2004. The Maryland field office reported that there no federally listed threatened or endangered species would be affected by the project. Copies of this correspondence can be found in Appendix A.

## PLANNING TEAM PARTICIPANTS

Name	Project Role	Affiliation
John Hale	Former Superintendent	NPS, National Capital Parks East
Gayle Hazelwood	Acting Superintendent	NPS, Fort Washington Park
John Marsh	Project Manager	NPS, Denver Service Center
